I am a trucker and like to have the Instant Traffic & weather available to me. It helps me know what lies ahead for me. We are paying for this service and it's a good service. I bought satellite radio because in certain parts of the US that I travel too I have a hard time finding stations that play the kind of music I like to listen to and I don't think anyone should be able to change that! So I strongly urge you to reject the NAB's petition 04-160 and support XM's ability to provide the kind of programming that we as subscribers have asked for and have agreed to pay for!
